Rhododendron Cuttings

Superior Rooting Methods

The Westbury Rose Co. is working hard formula. It is almost completely peat, to produce a stock of Rhododendrons with a fair mixture of Long Island sharp that will include most of the old hardy sand. Most of the seed boxes are topped favorites which have been off the market with a thin coating of plastic shavings. for a long period. Nothing is left undone Their Rhododendron cuttings all have a to procure the best and hardiest wood marvelous bunch of fibrous roots. Mag- for cuttings and to provide the surest nolia cuttings are specially grown, all means to propagate stock with superior transferred to pots, well filled with roots. root system for best results. They hope Most nurseries depend on regular stock soon to offer the so-called Dexter hybrids. in nursery rows to supply cutting wood. The value of peat for use in propagating The Westbury has rows of stool plants, has been well demonstrated, but through Magnolias, etc., so arranged as to supply persistent trial they have found the best an almost endless amount of cuttings.

Braving the cold winds of early Spring - Magnolias bloom abundantly for several weeks.

As specimens on the lawn or in combination with flowering shrubs and trees, Magnolias are attractive through the year.
